

Paver Jointing Sand

WASHED • SCREENED • DRIED

An important part of the paver installation process is the application of the proper jointing sand. **SEK-Surebond Paver Jointing Sand** will properly complete the interlocking of the segmental pavers because it is clean, angular and meets ASTM-C144 specifications. This type of sand is more stable in the paver joints and has the optimal gradation to ensure long term performance of the pavement system.

SEK-Surebond Paver Jointing Sand

- Angular Jointing Sand Meets ASTM-C144 Standards
- Recommended for Joints Up to 3/4"
