

EZWAY

The EZ Way to Build Stronger!

Learn More

Introducing the **EZ Way High-Performance System**: a cutting-edge solution combining our premium products - **EZ Set**, **EZ Bond** and **HydroSweep or PolySweep** - to deliver unmatched strength and durability for large-format hardscapes. Engineered for long-lasting resilience, this system enhances the longevity of modern outdoor spaces, making it perfect for both residential and light-duty commercial applications. Whether it's walkways, patios, pool decks, courtyards, or residential driveways, the **EZ Way System** provides a secure base and promotes drainability for pavers, natural stone, porcelain, and tile.

Transform your large format hardscapes with the **EZ Way High-Performance System** for lasting durability and enhanced functionality.

EZSET

TRASS SETTING BED

EZ Set is a trass-based, fiber-reinforced binder that forms a highly permeable, freeze-thaw-resistant bedding layer for large-format hardscapes on an open graded base. When combined with $\frac{3}{8}$ " angular clear aggregate, it delivers exceptional durability and long-lasting performance. **EZ Set** can also be used as a durable bedding layer on a conventional base.

- Trass-Blend Fiber Reinforced
- Promotes Internal System Drainage
- Reduces Freeze/Thaw Damage
- Minimizes Efflorescence
- Reduces Hollow Sound with Porcelain Hardscapes

WET SET

EZ Bond Wet Set, our latest innovation, is designed to deliver superior strength and durability for large-format hardscapes. This polymer-modified Portland cement Wet Set bonds paving units to the **EZ Set Trass Setting Bed** or sound concrete, creating a strong and lasting foundation.

- Polymer-Modified Portland Cement
- Bonds to EZ Set Trass Setting Bed or Concrete
- Provides Superior Strength and Durability
- Crack Resistant

JOINT SAND SOLUTIONS

To complete the **EZ Way High-Performance System** finish with a joint sand solution that ensures stable, durable joints. For a permeable system that maintains excellent drainage, use **HydroSweep Reactive Resin Sand**. For a conventional or non-permeable base, **PolySweep** is a high-strength, easy-to-install polymeric sand option.

HydroSweep

HydroSweep Reactive Resin Joint Sand is a one-part, ready-to-use resin sand that sets a new industry standard for strength and durability. Designed for both new and existing installations, it delivers long-lasting, hardened joints that withstand residential traffic and harsh weather conditions.

- Strong, Durable & Permeable
- Air-Reactive Resin
- Ready-to-Use
- Haze & Dust Free
- Installs Rain or Shine
- For Joints 1/8" - 1 1/2"
- Available in Ivory, Sandstone, Granite and Ebony

POLYSWEEP[®] JUST DAMN GOOD SAND[™]

PolySweep and **X-Treme Wide Joint** are premium polymeric sands designed for both residential and commercial applications, ensuring durable, flexible, and long-lasting joint stabilization. Engineered with Clear Set Technology[®], **PolySweep** is haze-free, resists cracking, and withstands harsh weather conditions.

- The Original - Just Damn Good Sand[®]
- Resists Cracking
- Prevents Sand Erosion
- Deters Weeds & Insects
- Reduces Maintenance
- PolySweep for joints up to 3/4", X-Treme Wide Joint for 1/8" to 4" joints
- Available in Pearl, Tan, Gray, Fieldstone, Platinum, Black
