Turf Installations with EZ Set Strength & Permeability Built In.

SEK-Surebond and SiteOne join forces to showcase the performance of **EZ Set Trass Bedding** in a real-world application—an outdoor dedicated pet area. The goal was to evaluate **EZ Set's** ability to deliver both **durability** and **drainability** under active use. With a properly prepped base and thoughtful installation, this trial proved how **EZ Set** can be a reliable solution for turf applications where long-term stability and water management are essential.

Turf Installation Summary: EZ Set Application

Project Size: ~165 sq. ft.

Site Prep:

- 6" depth of $\frac{3}{4}$ " clear stone base
- Geotextile fabric installed between base and subsoil
- Base installed by 3rd party contractor

Aggregate Details:

- $\frac{3}{4}$ " clear for base
- $\frac{1}{4}$ " - $\frac{3}{8}$ " clean chips for EZ Set Setting Bed
 - ◆ Approximately 2 tons (based on 3 full 5-gallon buckets of chip per bag of EZ Set)

EZ Set Details:

- Mix ratio: 3:2:1 (stone:water:EZ Set)
- Installed depth: 2" average (some areas up to 3 - 4")
- Bags used: 14 (60 lbs each)

Turf Adhesive (SB-15 Rapid Set):

- Bead size: $\frac{3}{8}$ " - $\frac{3}{4}$ "
- Pattern: Continuous "S" pattern. A squiggly line 6" apart can also be used. (see video)
- SB-15 Sausage tubes used: 15 (300 oz)

Turf Product Used:

- Brand: Pro-Trade Synthetic Turf
