EZ Way Hardscape

EZ Way Turf

HOW TO VIDEOS

Introducing **EZ Way High-Performance** products: cutting-edge hardscape solutions to deliver unmatched strength, durability, and permeability to hardscapes.

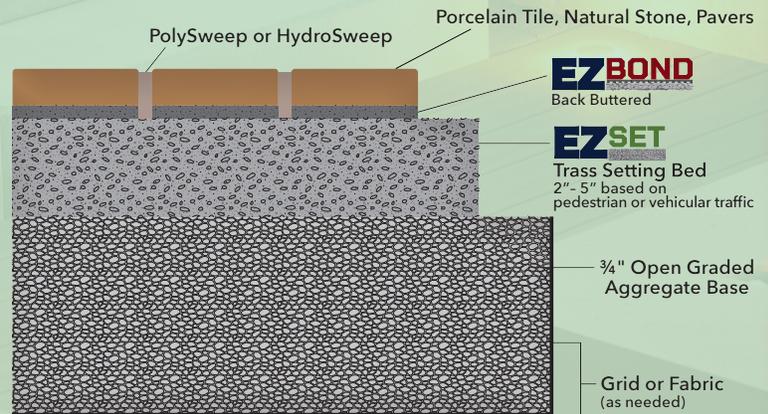

TRASS SETTING BED

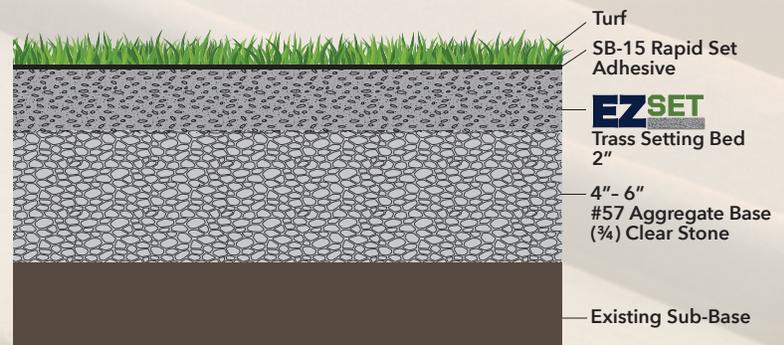

EZ Set is a trass-based, fiber-reinforced binder that forms a highly permeable, freeze-thaw-resistant bedding layer on an open-graded base. When used in hardscapes, it promotes internal drainage, minimizes efflorescence, and enhances long-term stability for thin-gauged natural stone, porcelain, and paver walkways, patios, pool decks, courtyards, and large-format residential driveways. EZ Set can also be used as a durable bedding layer on a conventional base.

- Ideal for Open-Graded Base Construction
- Mix Onsite with 3/8" Angular Clear Aggregate
- Trass-Blend Fiber-Reinforced Formulation
- Promotes Internal Drainage
- Reduces Freeze/Thaw Damage
- Minimizes Efflorescence
- Reduces Hollow Sound Under Porcelain
- Durable, Rigid Base for Turf Applications

The **EZ Way Turf System** delivers an efficient and durable solution for creating a permeable and rigid setting bed for synthetic turf outdoor living areas, turf accents in hardscapes and putting greens. By incorporating the **EZ Set** Trass-Setting Bed, it ensures quick installation while providing a durable and permeable base that offers long-term stability and efficient drainage. Completing the system, **SB-15 Rapid Set Adhesive** securely bonds turf to the **EZ Set** base, offering rapid set-up and a superior strength bond.

EZ BOND

EZ Bond Wet Set, our latest innovation, is designed to deliver superior strength and durable adhesion. This polymer-modified Portland cement Wet Set bonds paving units to the **EZ Set Trass Setting Bed** or other rigid systems, creating a strong and lasting foundation.

- Polymer-Modified Portland Cement
- Bonds to EZ Set Trass Setting Bed or Other Rigid Systems
- Provides Superior Strength and Durability
- Crack Resistant

WET SET

HydroSweep

HydroSweep Reactive Resin Joint Sand is breaking new ground as the **first resin joint sand made in the USA**. This one-part, ready-to-use formula sets a new standard for strength, durability, and drainage—creating long-lasting joints that stand up to residential traffic and harsh weather. The result: stabilized joints that stay strong—without sacrificing permeability in the EZ Way system.

JOINT STABILIZATION

STRENGTH + PERMEABILITY + AMERICAN MADE

- Strong, Durable & Permeable
- Air-Reactive Resin
- Ready-to-Use
- Haze & Dust Free
- Installs Rain or Shine
- For Joints 1/8" - 1 1/2"
- Packaged in 55 lb Buckets
