NEW PRODUCT FOCUS

EZSET

TRASS IS TRENDING!

EZ Set Trass Binder for a rigid setting bed is raising the bar for modern hardscape performance. This trass-based, fiber-reinforced system delivers the strength, permeability, and stability today's hardscape and turf installations demand.

Learn more on pages 6.

EZ MIXER

by (BARON®)

NEXT LEVEL POWER & PERFORMANCE

The Baron Forced Action Mixer delivers efficient and consistent mixing required for trending and high-performance materials like EZ Set Trass Bedding and the all-new ResinScape Resin Bound System. Details on page 15.

HydroSweep

STRENGTH+ PERMEABILITY+ AMERICAN MADE

Now made in the USA, HydroSweep Resin Sand is built for hardscapes on an open-graded base where drainage truly matters. On page 8, discover how this superior strength, performance-driven solution can make an impact on today's hardscapes.

INSTA-GRIP

INSTANT BOND... LASTING STRENGTH

InstaGrip Vertical Adhesive is engineered for fast, reliable hold on vertical applications. With instant grab, outstanding cohesion strength, and a solvent-free formula, it delivers the performance hardscape contractors count on.

Learn more on page 14.

NEW WAY to think about PAVEMENT...

ResinScape

RESIN BOUND SYSTEM

PERFORMANCE
POWERED BY
DALTEX

LEARN MORE

Introducing ResinScape, a modern pavement alternative that moves beyond concrete and asphalt. Designed for today's design-driven projects, ResinScape blends innovation, beauty, and performance into one seamless solution.

Seamless, Stone-Rich, Resin-Bound Surface
Permeable Performance for Effective Drainage
Reduces Surface Runoff
Eco-Friendly

With its design flexibility, ResinScape transforms **Driveways, Walkways, and Outdoor Spaces** into statement surfaces that are unique, and unmistakably elevated.

RESIDENTIAL & LIGHT COMMERCIAL
DRIVEWAYS • WALKWAYS • PATIOS • POOL SURROUNDS

BUILT TO HOLD. BUILT TO LAST.

LEARN MORE

HOW TO VIDEOS

Build Smart with Edging from SEK-Surebond.

Paver edging is essential to the strength, stability, and longevity of any hardscape project. Made in the USA, our full line of edging solutions is engineered for superior strength and long-term performance. Don't risk costly failures or your reputation - choose quality that holds.

Every great hardscape finishes strong - and stays strong -
with edging by SEK-Surebond.

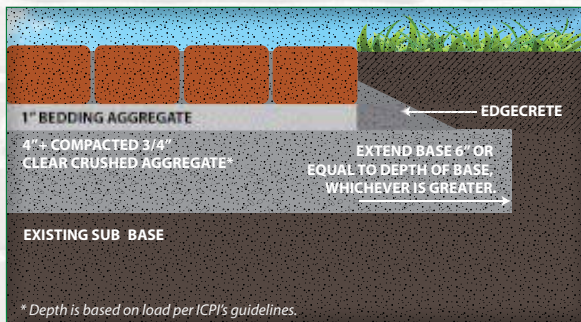

EDGECRETE

ENHANCED CONCRETE EDGING POLYMER MODIFIED - FIBER REINFORCED

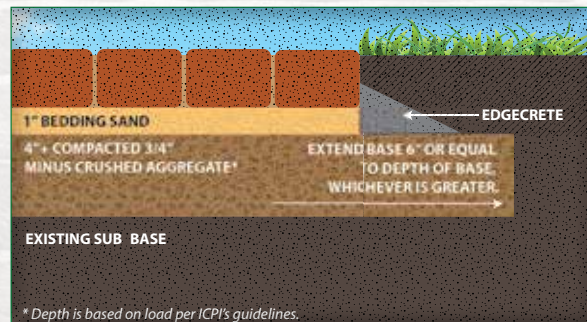

EdgeCrete fiber-reinforced, polymer-modified concrete edge restraint is designed for both open-graded and standard base applications. Ideal for pavers, stone and porcelain, it offers unbeatable strength and durability with an easy-to-mix, easy-to-install formula. Just add water, mix, and follow the simple installation instructions – no spikes needed.

FROM THE MAKERS OF SNAP EDGE: FLEXIBILITY MEETS STRENGTH

- Fiber Reinforced to Resist Cracking and Maintain Structural Integrity
- Polymer Modified for Superior Strength and Long-Lasting Performance
- Easy Installation - No Spikes Required
- Versatile - Perfect for Open-Graded and Standard Base Applications

Open Graded Base Applications
Coverage per 50 lb bag: 13'

Standard Base Applications
Coverage per 50 lb bag: 17'

Securing
Hardscapes
Since 1990

INJECTION MOLDED EDGING FOR PAVERS 2" - 3 1/8" IN HEIGHT

Snap Edge, the original **One Piece Does It All** paver restraint, is impossible to match in performance, strength, and reliability. Built tough for pros, its injection-molded design delivers maximum durability and long-term stability on every job. Designed for pavers or natural stone 2" - 3 1/8" thick, **Snap Edge** installs fast, holds tight, and finishes strong - every time.

BUILT TO LAST, IMPOSSIBLE TO MATCH.

- Thick, Buttressed Back Wall Locks Hardscape in Place
- Open Base Design Allows Grass Growth for an Invisible Edge
- Made from 100% Recycled HDPE—Won't Warp, Twist, or Crack
- Available in 8' lengths with 1 7/8" back wall height and 2 7/8" base width

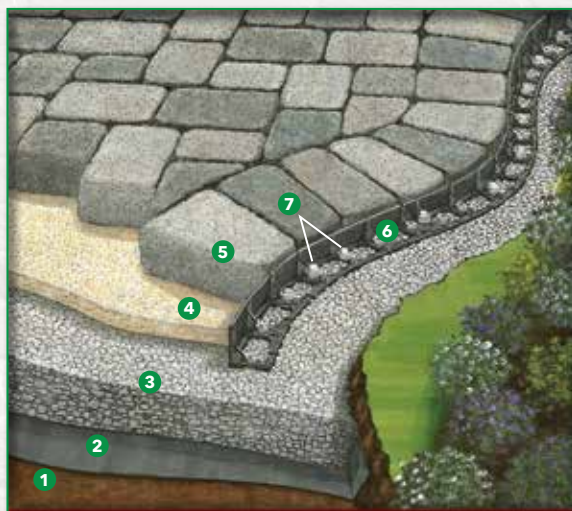

Strong Interlocking Joint with
Built-In Spike-Through Connector

"BEST PRACTICE" TYPICAL PAVER INSTALLATION

1. Compacted Soil Subgrade
2. Separation Fabric
3. Compacted Aggregate Base
4. Bedding Sand
5. Pavers
6. Snap Edge Paver Restraint
7. 8" - 10" Spikes

INJECTION MOLDED EDGING FOR PAVERS 1" - 2" IN HEIGHT

Low Profile is a contractor-grade paver restraint designed for pavers, stone and slabs 1 - 2" in height. Engineered with the same robust features as Snap Edge, it delivers the strength and durability needed for secure, long-lasting installations. Available in 6'8" lengths with 1 3/8" back wall height and 2 7/8" base width.

EZWAY HARDSCAPE

The EZ Way to Build Stronger!

LEARN MORE

EZ Way Hardscape

EZ Way Turf

HOW TO VIDEOS

Introducing **EZ Way High-Performance** products: cutting-edge hardscape solutions to deliver unmatched strength, durability, and permeability to hardscapes.

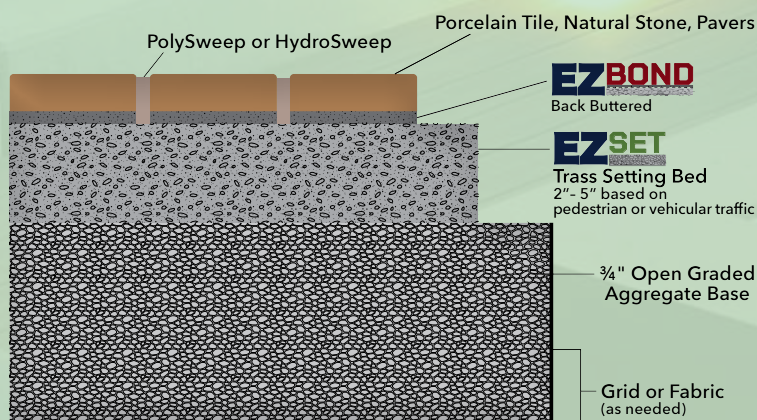

TRASS SETTING BED

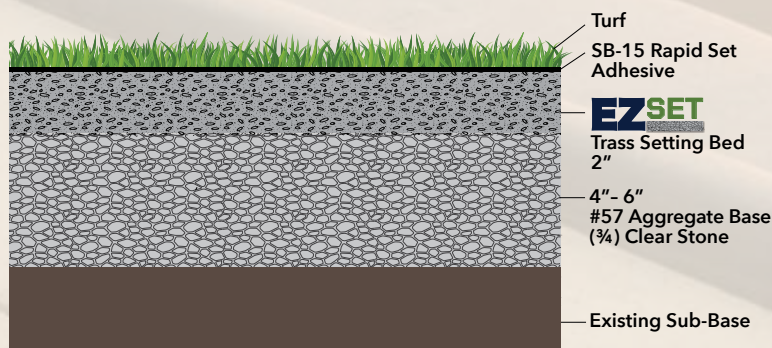

EZ Set is a trass-based, fiber-reinforced binder that forms a highly permeable, freeze-thaw-resistant bedding layer on an open-graded base. When used in hardscapes, it promotes internal drainage, minimizes efflorescence, and enhances long-term stability for thin-gauged natural stone, porcelain, and paver walkways, patios, pool decks, courtyards, and large-format residential driveways. EZ Set can also be used as a durable bedding layer on a conventional base.

- Ideal for Open-Graded Base Construction
- Mix Onsite with $\frac{3}{8}$ " Angular Clear Aggregate
- Trass-Blend Fiber-Reinforced Formulation
- Promotes Internal Drainage
- Reduces Freeze/Thaw Damage
- Minimizes Efflorescence
- Reduces Hollow Sound Under Porcelain
- Durable, Rigid Base for Turf Applications

The **EZ Way Turf System** delivers an efficient and durable solution for creating a permeable and rigid setting bed for synthetic turf outdoor living areas, turf accents in hardscapes and putting greens. By incorporating the **EZ Set** Trass-Setting Bed, it ensures quick installation while providing a durable and permeable base that offers long-term stability and efficient drainage. Completing the system, **SB-15 Rapid Set Adhesive** securely bonds turf to the **EZ Set** base, offering rapid set-up and a superior strength bond.

BUILD SMARTER *TODAY* FOR UNMATCHED DURABILITY *TOMORROW*

EZBOND

WET SET

EZ Bond Wet Set, our latest innovation, is designed to deliver superior strength and durable adhesion. This polymer-modified Portland cement Wet Set bonds paving units to the **EZ Set Trass Setting Bed** or other rigid systems, creating a strong and lasting foundation.

- Polymer-Modified Portland Cement
- Bonds to EZ Set Trass Setting Bed or Other Rigid Systems
- Provides Superior Strength and Durability
- Crack Resistant

EZOVERLAY

ADVANCED DRY SET FOR OVERLAYS POLYMER MODIFIED - FIBER REINFORCED

EZ Overlay is a polymer-modified, sand and cement blend that delivers superior strength with dry-set technology. Ready-to-use and easy to install, it saves time and effort compared to traditional wet bed systems. With no mixing required, **EZ Overlay** installs dry over existing concrete, bonding pavers, stone, or porcelain overlays for consistent, long-lasting results.

- Polymer Modified & Fiber Reinforced
- Superior Bond Strength
- No Mixing - Just Distribute, Level & Activate
- Installs On Top of Existing Concrete (in good condition)
- Mortar Bed Substitute - Cuts Install Time in Half
- Consistent Results

NON-PERMEABLE

4 WAYS TO JOINT STABILIZATION, A SOLUTION FOR EVERY PROJECT

LEARN MORE

HOW TO VIDEOS

Stabilized sand joints are critical to the strength, durability, and overall performance of any hardscape system. Proudly made in the USA, our four Joint Stabilization options ensure you have the right solution for every project. From permeable to non-permeable installations, each option is engineered to deliver long-lasting results and match your desired performance. With the right joint solution, your hardscapes will stay secure, look great, and perform for years to come.

NON-PERMEABLE

POLYSWEEP® JUST DAMN GOOD SAND™

#1 SOLUTION FOR CONVENTIONAL HARDSCAPES

PolySweep and **X-Treme Wide Joint** are premium polymeric sands trusted by contractors for over 15 years to deliver unmatched joint stabilization in residential and commercial hardscapes. Engineered with **Clear Set Technology®**, **PolySweep** provides a haze-free finish that resists cracking and stands up to the toughest weather. As the #1 choice for hardscapes built on a conventional base, **PolySweep** also offers versatility—serving as a durable, non-permeable joint fill option when installed over an open-graded/permeable base.

- **The Original - Just Damn Good Sand®**
- Haze-Free Guaranteed
- Easy to Install - No Tricky Watering
- Superior Strength, Long Lasting Durability
- Stronger Set Up
- PolySweep: joints up to ¾",
X-Treme Wide Joint: ⅛" - 4" joints

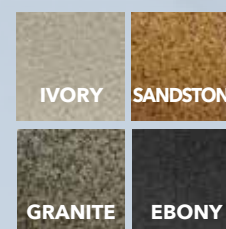

PERMEABLE

HydroSweep

STRENGTH + PERMEABILITY + AMERICAN MADE

HydroSweep Reactive Resin Joint Sand is breaking new ground as the **first resin joint sand made in the USA**. This one-part, ready-to-use formula sets a new standard for strength and durability, creating long-lasting joints that stand up to residential traffic and harsh weather. Engineered for performance, HydroSweep is permeable when installed on the recommended open-graded base—delivering the perfect balance of stability and drainage for today's hardscape projects.

- Strong, Durable & Permeable
- Air-Reactive Resin
- Ready-to-Use
- Haze & Dust Free
- Installs Rain or Shine
- For Joints ⅛" - 1½"
- Packaged in 55 lb Buckets

JOINT FILL SOLUTIONS

SUREBOND

PROTECTION THAT PAYS

NON-PERMEABLE

SEK JOINT SAND & SUREBOND: LOCK IN STRENGTH. ENHANCE THE BEAUTY.

Surebond Joint Stabilizing Sealers & SEK Joint Sand deliver powerful joint fill solutions for hardscapes that need stability, surface enhancement, and protection. Perfect for **new installations or restorations**, this system combines **ASTM C-144 SEK Joint Sand** with **Surebond** sealer options that strengthen, protect and revive surfaces. Ideal for hardscapes on a conventional base—or as a **non-permeable choice** on an open-graded base—this solution provides solid joint stabilization while adding long-lasting beauty and protection.

SEK JOINT SAND

- ASTM C-144 Joint Sand Ensures Solid, Stable Joints
- Washed, Screened & Dried for Less Dust & Clean Joints
- For Joints Up to 3/4"
- Available in Pearl, Tan, Gray, Fieldstone, Platinum & Black
- Packaged in Convenient 50 lb Bags

SUREBOND JOINT STABILIZING SEALERS

- Locks Joint Sand in Place: Reducing Sand Washout
- Provides Surface Protection
- Restores Faded Hardscapes to Like-New Appearance
- Natural Look, Enhancement or Gloss Finish Options Are Available
- Packaged in Gallons, Pails & Bulk

PERMCHIP™ & SB-1000: LOCKED-IN PERMEABILITY

PermChip™ Granite Chips are an excellent solution for permeable paving stone installations, delivering a beautiful aesthetic, durability and long-term performance. Perfect for both residential and commercial projects, **PermChip** handles tough conditions—freeze/thaw cycles and heavy traffic—without breaking down. Pair **PermChips** with **SB-1000 PermStik™** Chip Stabilizer to lock them in place and keep your permeable system performing for years.

PERMEABLE

PERMCHIP™ GRANITE CHIPS

- Meets ASTM #9 Specification
- 100% Fractured Surface for Surface Water Infiltration, Maximum Interlock and Stability
- Freeze/Thaw Resistant
- Ideal for Driveways, Patios, Walkways, and Parking Lots
- Available in Saturn Tan, Stormy Gray, Eclipse Black
- Packaged in 50 lb Bags & Super Sacks

SB-1000 PERMSTIK™

- Binds Granite Chips to Minimize Loss from Washout and Traffic
- Protects Surface Against Water, Salts, and Weathering
- Keeps Permeable Pavements Looking and Performing Their Best
- Recommended for Use with SEK PermChips™ for Optimal Results
- Packaged in Gallons, Pails & Bulk

LIGHTING

MAKE HARDSCAPES *SHINE* BEAUTIFUL, DURABLE, AFFORDABLE

Turn ordinary outdoor spaces into stunning showpieces—day **and** night. **Kerr Lighting** adds warmth, beauty, and pride of ownership to patios, walkways, driveways, seat walls, steps, and pillars. Whether it's new or enhancing an existing space, it's the simple upgrade that transforms hardscapes into a true highlight.

EASY INSTALLATION

Safe, low-voltage (12V) system installs quickly—no electrician required.

STYLES FOR EVERY SPACE

Choose from brick and cobble paver lights, wall and pillar lights, or sleek under-cap LEDs.

BUILT TO LAST

Tough, impact-resistant fixtures that won't rust, crack, or fade—even under light vehicle traffic or extreme weather.

PROFITABLE ADD-ON

Simple to install, budget-friendly, and a great way to elevate every job.

For over 30 years, SEK-Surebond has proudly manufactured hardscape installation accessories in the USA. Headquartered in Aurora, IL, we continue to support our mission of delivering quality solutions that ensure hardscapes are built to last. With a strong focus on performance and reliability, we help contractors achieve lasting results with confidence.
